

TWO NEGROES SHOT TO DEATH BY MOB AFTER RACE RIOT

Trouble Starts Over 10-Cent Purchase—Militia Holds Warrenton, N. C.

NORFOLK, N. C., Jan. 24.—Militia ordered out by Gov. Morrison are in control at Warrenton following the storming of the Warren County Jail by a masked mob that early today took out two negroes, Alfred Williams and Plummer Bullock and shot them to death.

No effort was made to molest the other eleven negroes who were confined in the jail in connection with a race clash here early yesterday. Bullock was said to have been the instigator and Williams one of the leaders of the negroes in the clash.

About 150 men were in the mob that entered the jail. The two negroes were taken into the woods, about a mile outside of town, and their bodies riddled with bullets. Only the jailer, John Green, a negro, was on duty at the jail when the mob surrounded it, and he was quickly subdued.

The trouble started last Tuesday, when Bullock went into a grocery store to buy 10 cents' worth of apples from Brady Traylor, a clerk. The negro was dissatisfied with his purchase and wanted his money back. He got it after some words, whereupon he cursed and threatened Traylor, it is said.

The Traylor received word Saturday night that the negroes were organizing to make good Bullock's threat. About a score of them gathered at the railroad station early Sunday with shot-guns. Baby Traylor, brother of Brady, approached Bullock to ask him what the trouble was about. While they were talking, Jerome Hunter, negro, fired at Traylor, who fell, and Hunter then shot him twice. The shooting then became general and several were wounded.

Among them were W. G. Upchurch, white, railroad engineer; W. J. Rainey, white, railroad inspector; Baby Traylor, white; Leroy Traylor, white; Henry Jones, negro; Jerome Hunter, negro; H. A. Toscos, white; and Robert Miss, negro. Some were said to be in a dangerous condition.

MILLIONS FOR MILL OWNERS IN COTTON "JOKER" IN TARIFF

(Continued From First Page.)

The Fordney bill is apparent. The competition brought about by imported cotton is extremely small. The imports of cotton cloth, according to Government statistics, amounted to less than 1 per cent. of the domestic production during 1920. There is no competition except in the longest staple.

GROWER NOT BENEFITED BY RAW COTTON DUTY.

But, by fixing 7 cents per pound on the manufactured product, the manufacturer of cotton goods will be able to again inflate his prices and benefit at the expense of the general public, which is only now beginning to receive some slight reductions in prices.

The cotton grower, for whose special benefit the emergency bill was supposed to be drawn, will receive none of the benefits of this duty on raw cotton.

In 1919 there were produced in this country only 34,000 bales of cotton having a staple of one and one-eighth to one and a quarter inches out of a total crop of approximately 14,000,000 bales. The cotton farmer is not asked for "protection," although he has clamored for Government relief from falling prices, due to readjustment of economic conditions, just as other farmers have done.

If tariff is put on 1 1/8 inch cloth it penalizes the production of cloth made of what is known in the trade as "lighter" yarns and above, which includes fine and plain fabrics, such as cambrics, organdies and fine lawns. PENALIZES EVERY WEARER OF COTTON IN THE U. S.

If the proposed duty is put on cloth made of 1 1/8 cotton it would penalize all goods made of "forties" yarn and above, which would include the bulk of cloth imported into this country. There are practically no imports of cloth into this country today made of yarns under "forties," and therefore no imports of cloth in which there is used cotton of a shorter staple than 1 1/8 inches.

About the only possible advantage to growers in the cotton problem is that it might stimulate the production of the little American Egyptian cotton, grown in Arizona and California, but at the present time the domestic demand for long staple cotton greatly exceeds any possible domestic production, and these growers are not asking for "protection." The American production of this grade of cotton is only about 60,000 bales, and, therefore, totally inadequate to supply the demand, so that the necessity for "protection" is the merest sham. The purpose of the cotton provision is to make it possible for the manufacturers of cotton goods to recover some of their losses from the slump in prices, and even then, woman and child who wear apparel containing cotton will be penalized if the "tariff" bill gets over.

SEVEN MEN PICKED FOR CABINET GET READY FOR JOBS

(Continued From First Page.)

Secretary of the Navy because he is a graduate of the Naval Academy, but in truth Mr. Weeks wanted to be Secretary of the Treasury, as he is a banker. His own objection to becoming Secretary of the Navy was that he would be embarrassed in passing upon promotions of his own classmates who are now high officers in the American Navy. Originally it was intended to make Gov. Lowden Secretary of War, but since Mr. Harding was persuaded to take A. W. Mellon of Pittsburgh for the Secretaryship of the Treasury and since he wanted Mr. Weeks in the Cabinet too, it became necessary to transfer Mr. Weeks to the portfolio of War. EITHER WAR OR NAVY WOULD SUIT LOWDEN.

The assumption was that it would make little difference to Gov. Lowden whether he took over the affairs of the Army or the Navy so the present plan is to urge the acceptance of the Navy portfolio on the Illinois man, whose strength at the Republican Convention was thrown at the psychological moment to Harding and thus made possible his nomination.

It is not considered likely that Mr. Harding will start out his administration by recognizing the objection made by the Thompson machine in Chicago, for the President-elect is a regular Republican and at his sympathies have been with the Lowden wing of the party. It is also understood that men of influence in Illinois have informed Mr. Harding that the moral effect of eliminating Lowden from the Cabinet might be more inconsequential to the Thompson wing than would be good for the Republican party nationally, so the reward to be given Mr. Lowden is being carefully considered.

When it became evident that Mr. Mellon's qualifications for the Secretaryship of the Treasury were urged by Pennsylvania leaders, who made a

convincing presentation of the case, Senator Harding was left with the necessity of picking an Illinois man for the Cabinet. The case then narrowed down to Gov. Lowden and Albert D. Jasker, President of Lord & Thomas and one of the intimate advisers of Mr. Harding during the last campaign.

Mr. Lowden's political prominence and the part he played at the Chicago convention in nominating Harding have been the factors in his favor. He is by no means a certainty for the Cabinet, an hour-minute office and transfers may be necessary, but he is back again in the Cabinet race and being favorably considered for the Secretaryship of the Navy.

The elimination of A. T. Hert of Kentucky for the War portfolio caused Mr. Harding considerable pain, for he likes Hert and wants to reward him for the part he played as a Lowden manager in swinging the convention to Harding. But Hert comes from Kentucky, which State voted for Cox, and to pick anybody from a Southern State which went Democratic would be to get into trouble with the Republicans, who carried Tennessee and Oklahoma and Missouri.

Some of Mr. Hert's friends urged
